Sell your Java skills to

{OpenGrok

project

We are searching for a student to participate in intership program (paid) to be hacking^Wworking on wickedly fast source code search engine and browser called OpenGrok. The project is written in Java and is fully opensource so your contributions will be visible to everyone :-) Also, you will be maintaining internal deployment of OpenGrok which happens to be one of the largest installations in the world.

For more details about the project see https://github.com/OpenGrok/OpenGrok

Requested qualities/knowledge:
- Java, JSP, HTML, CSS, JavaScript
- some Source Code Management experience (git, Mercurial, ...)
- strong communication skills, self-reliance
- *NIX (shell scripting)
- related technologies are plus (ant, Lucene, ...)

We expect you to work on this beautiful piece of software at least 1 day a week from the offices in Chodov.
