

# SIEMENS

## Corporate Research

Princeton, New Jersey, USA

Siemens Corporate Research USA located in Princeton NJ is looking for talented students in computer science or related fields for internships of 6 months or longer. The students participate in research projects and develop **large scale decision support systems** using **statistical, machine learning, data mining and visualization techniques** for industrial and medical applications such as

- **signal processing for predictive maintenance**
- **integration and management of medical data**
- **asset and infrastructure condition monitoring**

We require excellent development skills in **Java**. Experience with **relational databases** and **web** technologies such as **ActionScript/Flex** is desirable. The compensation includes a monthly stipend and a rental car for the time of the internship period. At Siemens you will find a big community of international interns.

This is an **immediate** opening, with a starting date this spring (March/April).

If interested please contact (with a resume/cover letter):

**ciprian.raileanu@siemens.com**

**subject: Software Engineering Internship 2010**
